Precio: 35000

Styrofoam compactor APOLO C100 can compact all kinds of EPS scraps and bulk EPS scraps into a compact size. The compactor machine can compact the volume of Styrofoam as 50:1. Its similar to make a laptop become a small key of the keyboard. And compressed density of EPS scraps is 200-400kg/m³. The compact size of EPS is easy to transport and store in a warehouse. Whats more, it is also applicable to materials including EPS, XPS and PSP, like takeaway food containers and cups. APOLO C100 system offers a great convenience to you. Whats more, ended up with landfills or sent to the ocean also can pollute the soil and water which is closely connected with us. So its better for us to use machine to compact the Styrofoam in order to make a recyclable circulation. For more information about our compactors, or to find out how much you could earn from your compacted polystyrene, get in touch with us today. Either call us on +1 909 509 4199, or send to Email Lucyshen@intco.com, and we

A-C100
